

Worksheet

Humans in the Environment

Humans have changed the environment around them in many ways, including removing woodlands, putting up buildings and digging quarries.

Instructions

1. Look around the site taking note of the features of the landscape.
2. As accurately as you can sketch a land use map in the space below. Include: key showing the different land use types e.g. water, grazing field, arable field, trees etc.

Location:

1. Select a feature of the area and name it below - for example, quarry, building, river.
Is this natural or man-made? Explain your answer.
